

The Mineralogical Society of Great Britain & Ireland Electronic Publishing Policy

Journals Online

The Mineralogical Society of Great Britain & Ireland (MSGBI) makes its journals available in electronic form via the Internet:

Clay Minerals (ISSN 0009-8558) and *Mineralogical Magazine* (ISSN 0026-461X) are provided online through both Ingenta <http://www.ingentaconnect.com/content/minsoc/cm> and <http://www.ingentaconnect.com/content/minsoc/mag>) and through GeoScienceWorld (www.geoscienceworld.org) and *MinAbs Online* is available at www.minabs.com.

MSGBI is also a participating publisher in *Elements* (ISSN 1811-5209) and this is available online through GeoScienceWorld (www.geoscienceworld.org). Copies of *Elements* are provided to library subscribers to *Mineralogical Magazine*, *Clay Minerals* and *MinAbs Online*.

Access

Titles, authors, and abstracts of articles in *Clay Minerals* and *Mineralogical Magazine* are available to all, at no cost, on both the Ingenta and GeoScienceWorld websites. A subscription is required to view the full text of articles on both sites.

MinAbs Online is a subscription only product, but is available (www.minabs.com) free of charge to members of MSGBI.

Electronic-only subscriptions

Subscriptions to electronic-only versions of MSGBI journals are available. Please contact the MSGBI office (admin@minersoc.org) for price information.

Subscribers to GeoScienceWorld may purchase paper versions of *Mineralogical Magazine* and *Clay Minerals*, at a discount of 50%, to accompany their electronic access. Please contact the MSGBI office (admin@minersoc.org) for price details.

Online formats

Papers in *Clay Minerals* and *Mineralogical Magazine* available through the Ingenta platform are in pdf format.

Papers in *Clay Minerals* and *Mineralogical Magazine* available through GeoScienceWorld are in both pdf and html formats. The html version has reference linking, downloadable, high-resolution figures and tables, the ability to export bibliographic references to various citation managers, and searching of the full text.

Back issues

Access to all electronic back issues online is included in a current subscription.

Authentication for online access

For material on the Ingenta website, access is provided following authentication by means of IP or range of IP addresses for institutional subscribers and ID + password for members.

Access to material hosted on GeoScienceWorld requires a subscription to GeoScienceWorld. The method of authentication is by IP address.

Proxy servers

Organizations that network their environment with a proxy server may register the IP address of the proxy server for authentication provided they limit the access to the authorized sites and users by technical methods, such as router setting, or some other means. The proxy server must be owned by the end-user, not a subscription agency or reseller. Access must not be provided via an open proxy server.

Number of concurrent users

MSGBI places no restrictions on the number of concurrent users.

Availability

MSGBI and its suppliers shall use all reasonable endeavors to provide 24 hour electronic availability of its online journals, but if access is suspended or interrupted or a fault or defect occurs which prevents access to the server, MSGBI shall accept no liability. The User is responsible for all charges associated with accessing the content, including any computer equipment, telephone or Internet connections and access software. MSGBI reserves the right to refuse access to any individual, network or User at any time.

Sites

A 'site' is defined as a single contiguous geographical location in a specific city or locale, e.g. The University of Michigan in Ann Arbor. All IP addresses within the range supplied by the end-user can access the electronic version. Such a site would normally have been covered by a single subscription to the paper version. The Society will consider applications to network its content over multiple sites which are not contiguous but which are part of a single institution. Contact the Society office (admin@minersoc.org).

Licenses

A signed license agreement is not required for online access. However, all subscribers are expected to follow MSGBI's Electronic Publishing Policies.

Discontinued Subscriptions

If an organization discontinues its subscription, it will continue to have online access to those volumes to which it subscribed on the Ingenta website. The policies for GeoScienceWorld are given in the subscriber's Site License Agreement.

Grace period

MSGBI grants a grace period after a subscription has expired in order for the next year's subscription to be received. The grace period is generally a time period that covers up to 3 months. However, there may be an additional fee charged for late renewals.

Usage Report

Ingenta provides usage reports for *Clay Minerals* and *Mineralogical Magazine* to individual institutions. Please contact your Ingenta representative for details. Usage reports are also available to subscribers of GeoScienceWorld.

Use of Published Works Online

Material from *Clay Minerals* and *Mineralogical Magazine* on the Ingenta and GeoScienceWorld websites may be downloaded (one machine readable copy and one print copy per page) for personal, non-commercial use only. A subscriber may not:

- (a) sell, distribute, license, rent, further reproduce, transmit, modify, adapt, perform, display (including adaptations/displays such as by "framing"), or otherwise exploit the material, or any element of it, for any commercial purpose;
- (b) make the material, or any element of it, available by any means to persons other than authorized users (but see our 'Open Access policy' below);
- (c) make the material, or any element of it, available on, or by, electronic bulletin boards, news groups, Web sites, FTP or any other means of posting or transmitting material on the Internet, an on-line service or wide area network (but see our 'Open Access policy' below);
- (e) store in electronic or any other form, any significant portion of the material (but see our 'Open Access policy' below);
- (d) remove or obscure the MSGBI's copyright notice from the material including hard-copy prints-out;
- (e) use the material to create any derivative work, product or service, or merge the material with any other product, database, or service;
- (f) alter, amend, modify, translate, or change the material;
- (g) undertake any activity which may have a damaging effect on MSGBI's ability to achieve revenue through selling and marketing the material (but see our 'Open Access policy' below);
- (h) otherwise use the material supplied by MSGBI in a manner that would infringe the copyright or other proprietary rights contained within it; or
- (i) make the material or any part of it available by remote access to any person other than authorized users

An "authorized user" of an institutional subscriber is:

- (a) every member of staff employed by or otherwise accredited by the subscriber;
- (b) every student accredited to the subscriber for the purposes of full-time or part-time attendance;
- (c) individual members of the public registered as users of the subscriber's library or information service; and
- (d) individual members of the public permitted to use the subscriber's library or information services; in each case who are permitted general access to the Network by the Licensee.

Subscribers shall cause all authorized users to abide by all of the terms and conditions of these policies. In all other cases, only the subscriber is permitted to access the paid subscription service materials

Subscribers found in violation of these policies may have immediate revocation of access to these sites, as well as any other applicable civil or criminal penalties. Similarly, sharing a subscriber password with a non-subscriber or otherwise making the paid subscription service available to third parties is strictly prohibited, and may subject the subscriber participating in such activities to immediate revocation of access to the paid

subscription services; and, the subscriber and any third party, to any other applicable civil or criminal penalties under copyright or other laws.

Copyright and basic permissions

Much of the materials contained on the MSGBI website and in its journals are protected under copyright and other laws. Copyright of the materials contained on the MSGBI website, including, but not limited to, the textual material, artwork, photographs, computer software, audio and visual elements, is owned by The Mineralogical Society of Great Britain & Ireland unless otherwise stated. In addition, copyright in the selection, arrangement and coordination of materials in this website is owned exclusively by MSGBI.

All materials on this site protected by copyright law may not be reproduced, distributed, transmitted, displayed, published or broadcast without the prior written permission of the Mineralogical Society of Great Britain & Ireland. Trademark, copyright or other notice may not be altered or removed any from copies of the content. Permission to reproduce material may be obtained by contacting the Society office (admin@minersoc.org).

Inter Library Loan (ILL)

MSGBI allows libraries to make a single copy of an article from their collection. The copy may be made from either the paper edition or the electronic edition. The library is not allowed to forward the electronic edition; rather the library must scan the copy they made, and send that digital copy to the requesting library.

A library is allowed to copy 5 articles from a single title per year for ILL purposes. For the 6th and succeeding copies the library must pay a copyright fee to the Copyright Licensing Agency (<http://www.cla.co.uk>).

If the library supplies articles for for-profit clients, such fulfillment is counted separately from the above and the copyright fee must be paid for each article.

Open-access and self-archiving

For MSGBI, the term 'open-access' means the full text of an article in the journal is made free to anyone from the moment it is published.

MSGBI provides open-access to any article posted on the MSGBI website or on the Ingenta or GeoScienceWorld sites for which an author pays the £150 per page creation cost. The author is free to link to this free-access article from any other site.

The term 'Self-archiving' means the article is posted and made available on another institution's website, free of charge to all. MSGBI will provide a pdf file for self-archiving of any article for which an author pays the £150 per page creation cost.

Alternatively, the Society will provide a pdf file, free of charge, for posting on another institution's website or suitable data repository, but it is not to be posted until a period of two years from the date of publication has elapsed.

Authors are free to post pre-reviewed but not post-reviewed versions of their manuscripts on personal, institutional or repository websites.
